

Radio World Championship Results

ISAF are in the process of creating an interesting addition to the Radio Sailing section on their website. This new section will feature a result table detailing the skippers, their yachts and the countries represented together with a few photographs from the events of past ISAF World Championships. Pop-up pages are available for the International A Class, the 10 Rater, the Marblehead and of course the International One Metre. This new feature further illustrates the on going commitment of ISAF to the future of worldwide Radio Sailing.

The location of the web page is <http://www.sailing.org/classes/index.php>. Go to the Radio Sailing Classes panel and select your class.

It is expected that the tables will take some time to be completed but then they will form a permanent record of the top achievements in the world of Radio Sailing. When these tables are completed we will be adding the current ones to our own web site.
